WORK EXPERIENCE

IT Consultant - August/2022 - now

- Project management to drive productivity and efficiency for small to large scale businesses.
- Optimizing website traffic and management of cloud infrastructure.
- Auditing and consultancy for network optimization, documentation, and infrastructure of enterprises.

Technical Project Manager, Watchtower - March/2022 - August/2022

- Managed and coordinated all team projects using Agile, Gantt, Redmine, and In-house project management tools.
- Created and implemented workflow processes for project facilitators that increased task-handling efficiency and project completion by 50%.
- Developed on-demand solutions for risks, bottlenecks, and “curve balls” during the project life cycle and maintained detailed documentation for all projects using Git, GitHub, and Sharepoint Sites.
- Monitored and tracked project progress to ensure deadlines were met.
- Evaluated and recommended changes to existing work processes to improve productivity.
- Collaborated and partnered with regional technicians to evaluate the technical needs of remote offices and organized the implementation of agreed solutions.

Network Engineer, Watchtower - May/2019 - August/2022

- Designed network systems and data centers using Microsoft Visio to meet global design standards.
- Installed, configured, and tested Cisco and HPE L2 and L3 switches and routers, Cisco and Aruba wireless access points, and Juniper firewalls.
- Monitored and analyzed network performance daily using Zabbix and Inmon to improve QoS and consistently meet SLA of 98 - 99%.
- Designed, implemented, and administered Linux Servers on VMWare using Ubuntu Server and EVE-NG.

- Revised and updated the old Racktables documentation database to match the current network and server infrastructure.

Systems Engineer, Watchtower - May/2016 - May/2019

- Remediated virus incidents on the Branch HQ and remote offices networks using Microsoft System Center Endpoint Protection (SCEP).
- Managed Active Directory for over 1,200 user accounts and software deployment/patching through Microsoft System Center Configuration Manager (SCCM).
- Ensured all user-client tasks were handled or escalated using the Redmine ticketing system.
- Administered Apple systems using Jamf and handled deployment of Apple-specific applications.
